PROFILE

Hi, I'm Alok. I study B.Tech Biotechnology at ANDUAT, Ayodhya, and the part I enjoy most is the computer side of biology. That's bioinformatics and computational biology, and it's where I want to go.

In July 2026 I spent ten days at ICAR NBFGR in Lucknow learning bioinformatics tools and databases, and it made me even more sure this is what I want to do.

I use AI a lot when I research. It helps me get through papers, poke at datasets and keep my notes clean. I also build apps. Hobee is my Android app, and I'm working on a new focus app for students right now. On the side, I'm part of a small team building a youth-led healthcare accessibility platform. It's still in progress.

EDUCATION

2024 to present

B.Tech Biotechnology

Acharya Narendra Deva University of Agriculture and Technology (ANDUAT), Ayodhya

Third year. My focus is bioinformatics and computational biology.

TRAINING

7 to 16 July 2026

Bioinformatics for Beginners: Tools, Databases and Applications

ICAR National Bureau of Fish Genetic Resources (NBFGR), Lucknow

- 10-day training course
- Worked with bioinformatics tools and biological databases, and how they get used in real research
- Certificate awarded on completion

SKILLS

Bioinformatics: Sequence analysis, Biological databases, CATH, Structure-based analysis

Software: Flutter, Dart, Python, JavaScript, Android, Git

AI for research: Literature review, Datasets, Documentation

Professional: Project leadership, Pitch decks, Strategic planning, Teamwork

PROJECTS

In progress

Healthcare accessibility initiative

A youth-led healthcare accessibility platform I'm building with a small team. Still early.

Android · Flutter

Hobee

A Reddit gallery app with no ads. It searches live posts and archives, hides duplicate photos, saves images in full quality, and has a glass look I love.

Python · Bioinformatics

biofx_python

My fork of the code from Mastering Python for Bioinformatics. It's where I practise.

CERTIFICATIONS AND ACHIEVEMENTS

2026

Certificate: Bioinformatics for Beginners

ICAR NBFGR, Lucknow

Sept 2025

BIZNOVATOR SproutIT 2025

Symbiosis Centre for Information Technology

Participant.

2025

LAUNCH X E-Summit 2025 Finalist

Jadavpur University E-Cell

Finalist for a healthcare startup idea.

2026

Empresario Business Model Competition 2026

E-Cell, IIT Kharagpur

Master Session participant.

Aug 2025

Tata Imagination Challenge

Participant.

Jan 2025

3030 Eklavya Program

IIT Gandhinagar

Participant.
